Local / National / International Consultations

NEUROFEEDBACK SERVICES

Initial Mini-Q® EEG Assessment **\$ 425.00**

The initial assessment reviews present symptoms and difficulties. The Mini-Q® 19-channel assessment is then started. This involves placing a cap with 19 sensors on the individual's head. Conductive paste is applied to each location to ensure a quality reception of the brain wave patterns. The paste is washable and is approved by the FDA.

Baseline measurements are taken at the 19 different locations. The BrainMaster Mini-Q® assessment device and the BrainMaster Atlantis II® processing device are also FDA approved.

An analysis of the EEG assessment is then done to localize areas of concern. This information is also compared against a normative database. A consultation is then made to discuss the results of the Mini-Q® EEG, as well as the proposed treatment plan.

Neurofeedback Training **\$ 85.00 / session**

Initially, training is done twice per week. A home training unit is also available to decrease the number of office visits, if you live some distance away.

In accordance with the treatment protocol, sensors are applied to the scalp in the critical training areas. Certain brain wave patterns may be chosen to be inhibited (decreased), while others may be trained to be more activated.

The training is done through a combination of visual and auditory reinforcement. The individual sees an animation being activated on the computer and hears a tone when the training criteria are met. The reinforcement is adjusted as progress is made. Through this process, the areas of the brain are able to optimize their functioning.

Differences in symptomatology are often reported after six to ten training sessions. Additional training sessions are frequently required to achieve optimal results.

Neurofeedback Training Packages

10 Prepaid Sessions
(savings of \$100) **\$ 750.00**

20 Prepaid Sessions
(savings of \$150) **\$1,550.00**

Reassessment Using the Mini-Q® EEG **\$ 325.00**

It will periodically be necessary to conduct additional Mini-Q® assessments. The reassessment allows us to step back and take a look at the whole picture and decide if additional treatment protocols are necessary. This will also give us an objective look at progress.

Remote Training – Interpretation and Treatment Plan Changes **\$ 85.00**

For those who live some distance from the office or wish to lessen their trips to the office, home training units are available. You are able to submit data from your home unit to be interpreted. If necessary, treatment plan parameters can also be changed to adjust for treatment progress.

OTHER SERVICES / FEES

Individual / Family Counseling	\$ 135.00 / hour
Missed Appointments Subject To No Show Fee	\$ 100.00
Travel until destination is reached	\$ 150.00 / day
Airfare, plus applicable charges, billed at cost of trip	

Lodging

In order to help defray costs, I am willing to stay with the host family. If this is not convenient, hotel and lodging expenses are extra.

Deposit

For National and International trips, a deposit of 50%, plus airfare, is required prior to departure.

PAYMENT METHODS: Visa / MasterCard / Discover / American Express / Checks

Payment is due at the time service is rendered.
